

# Faux Flocking

You can make faux flocking quickly and easily using Stampin' Up products.

1. Stamp your image in versa mark. A bold image works best or you can use your versa marker to fill in line images like Santa's beard.

2. Sprinkle with heat and stick and heat just until sticky

3. Cut a piece of grosgrain ribbon at each rib. It sounds more tedious than it actually is. You only need 1 or 2 inches of ribbon so it's a great way to use up your scraps.

4. Gently push the shredded ribbon around on your stamped image with your finger.

You can use more than one colour if desired.

5. Heat image from bottom to set heat & stick. Let cool for a few seconds then remove excess fluff with a soft brush.

For the flower on the left I used turquoise craft ink, turquoise ribbon and glossy white paper. Try some coloured cardstock for different effects.
